

**Thank you for joining us for the Step Up Google Online Career Challenge**

While you're waiting – why  
not follow us?

# Win a £50 e-voucher for talking about your future

**Step 1:** Share a post on TikTok (15-60 sec video or slider) about the Google Career Challenge.

*Be honest. Be creative. Be yourself.  
No “perfect” videos needed!*

## Inspiration – why not post about...

- What you loved most about the Google Career Challenge.
- What you have learned.
- What you didn't realise data could be used for.
- Why you think work experience is important.

## Step 2: How to enter

1. Follow us
  2. Post your TikTok
  3. Tag **@wedigdata**
  4. Use **#MyDigDataFuture**
- That's it. You've entered.

## Step 3: The prize 🎁

A **£50 e-voucher** for a retailer of your choice. One winner chosen at random **on Thursday 19<sup>th</sup> February**.

# Welcome to the Step Up Google live online career challenge

## 1. Today's event – 45 minutes

1. Watch the live Google briefing session to meet the team and find out how to solve this career challenge.
2. Communicate with us using the Q&A function unless the Chat is enabled.
3. If you have any technical difficulties, please email [info@digdata.online](mailto:info@digdata.online).
4. This call is being recorded and all attendee videos and microphones are disabled.

## 2. What we need from you

- Respectful and appropriate behaviour throughout the briefing session.
- A positive attitude and a willingness to learn.
- There will be several opportunities throughout today's session to ask questions using the Chat function.

## 3. How will you benefit from completing this challenge?

- Learn how Google use data every day to make decisions and solve problems.
- Receive a virtual work experience certificate
- Gain valuable data literacy skills.
- An extra-curricular experience to add to your CV, LinkedIn profile and job applications.

# Agenda

- 01 Introduction To Google & Alphabet
- 02 Google Marketing
- 03 Gemini for Students
- 04 The Challenge
- 05 Q&A

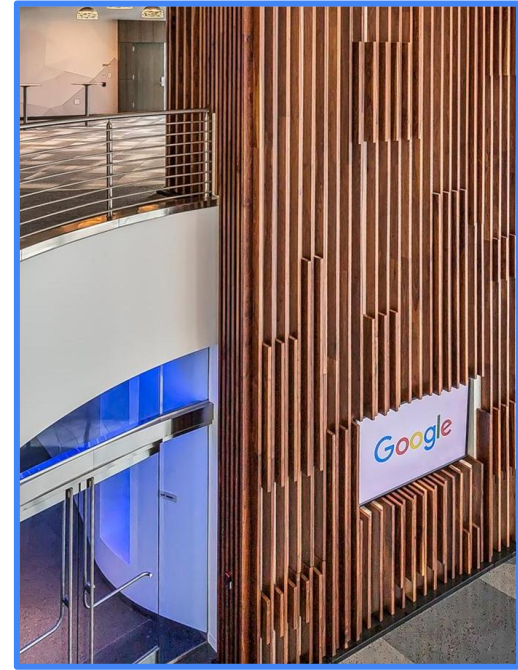

01

# Introduction to Google & Alphabet

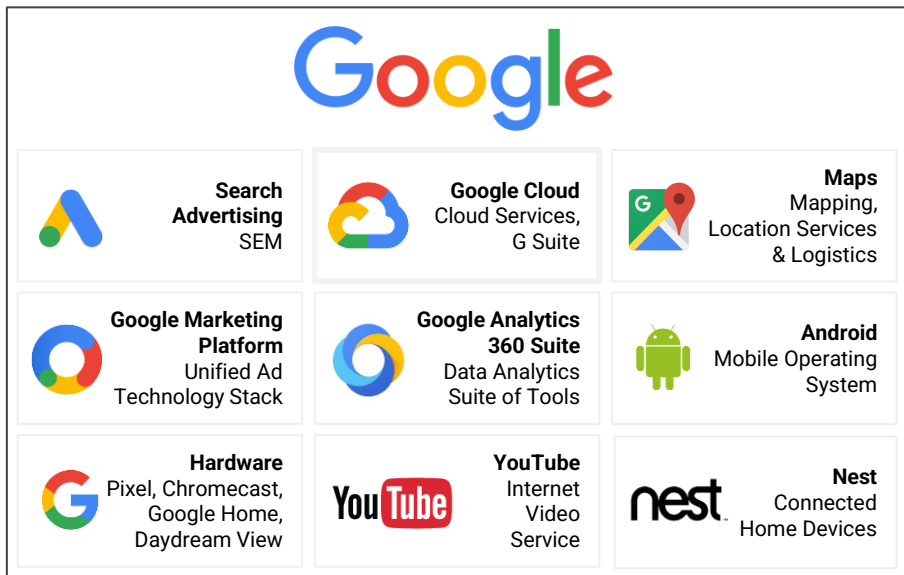

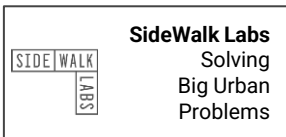

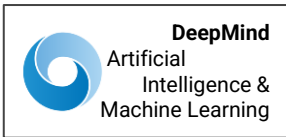

# Google in 1998

# Alphabet in 2024

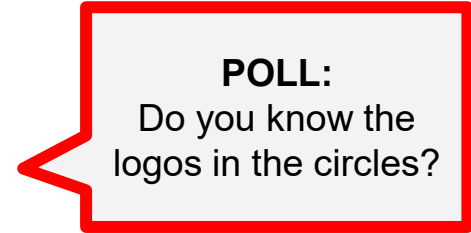

# Alphabet

**Mission:**

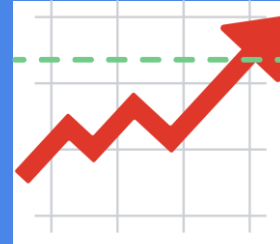

Organise the world's information and make it universally accessible and useful.

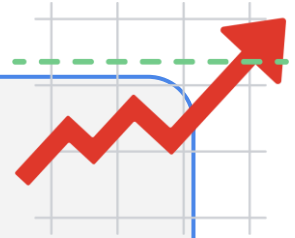

02

# Google Marketing

# What is Marketing?

# What is Marketing?

**A:** The process by which companies create value for customers and build strong relationships to capture value from them.

**B:** Making posters, ads and social media posts to sell products to people.

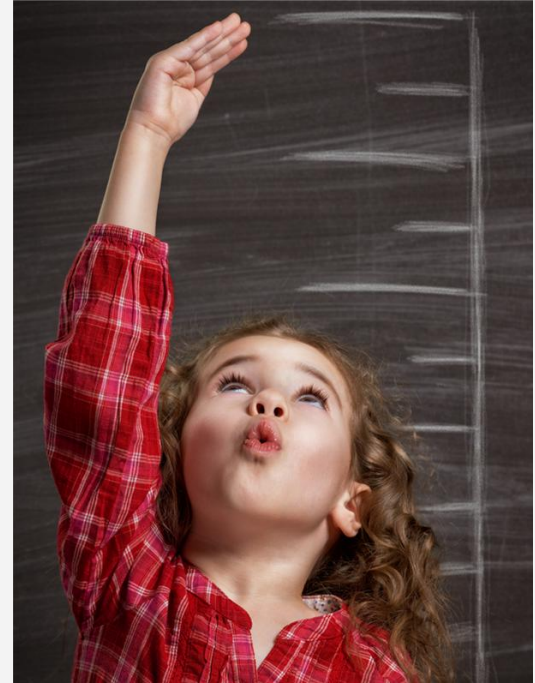

**C:** Convincing people to buy things using catchy slogans and tricks.

**D:** Deciding how much something costs and stocking it in shops.

Definition

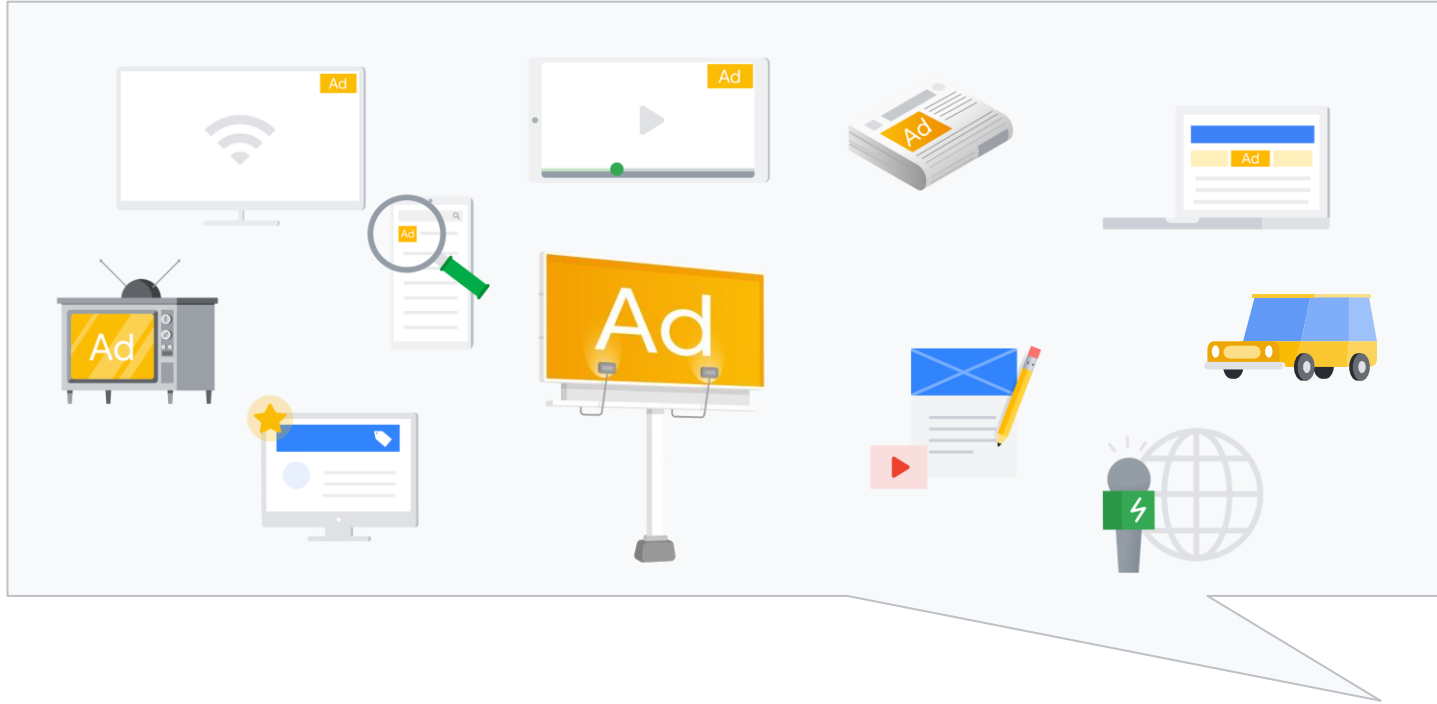

In order to grow a business will use **Marketing** to:

- Attract a new customer base
- Retain that base by continuing to satisfy their needs

Definition

# Types of Marketing

Three main questions we try to answer with measuring marketing effectiveness.

Marketing Effectiveness

# Gemini For Students

## ◆ AI Overview

Gemini is a family of multimodal generative AI models and intelligent assistants developed by Google DeepMind. It is designed to understand, operate across, and combine text, images, video, audio, and code, acting as a successor to LaMDA and PaLM 2. It powers a chatbot (formerly Bard), mobile AI experiences on Android, and workspace tools. 🔗

**Key Aspects of Gemini:**

- **Multimodal Capabilities:** Built from the ground up, Gemini can seamlessly understand and generate content across different formats, including text, images, and video.
- **AI Assistant:** It functions as a conversational assistant on phones (app/Android) and web browsers, capable of answering complex queries, creating content, and assisting with tasks.
- **Integration:** Gemini is integrated into [Google Workspace apps](#) (Docs, Gmail) and Android devices to help users brainstorm, analyze, and manage tasks.
- **Models:** It exists in different versions (e.g., Ultra, Pro, Flash, Nano) to operate on everything from mobile devices to data centers.
- **Real-time Interaction:** Features like [Gemini Live](#) allow for natural, free-flowing conversations. 🔗

It acts as a direct competitor to products like ChatGPT, providing web-connected, AI-driven assistance within the [Google ecosystem](#). 🔗

# AI Adoption Soars Among Students, But Gemini Lags Behind

**92%** Students are using AI

**We're not the first choice AI tool.**

ChatGPT SOV is significantly higher than Gemini in the UK

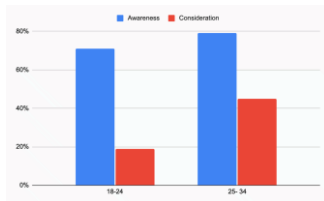

(July '25)

**We don't own the conversation...**

Students are

**46%**

Less likely to consider Gemini once being made aware (vs 25-34)

**...Students are less likely to consider us.**

**AI Adoption**

# We have a clear and superior value proposition for students

Students get a **free-of-charge** upgrade of Gemini until the end of finals **2026** when you sign up by 15 September

Get unlimited homework help, revise for exams and perfect your writing with our best AI model. With Google AI Pro, your free-of-charge upgrade includes more access to Veo 3 Fast, Deep Research, NotebookLM and 2 TB of free-of-charge storage.

Opportunity

05

# The Challenge

**The Campaign Brief:**  
Help Google launch a multi-market digital marketing campaign to reach and excite university students about Gemini Pro.

**Budget: \$10M USD**

**Length: 8 weeks**

**Markets: 3**

Identify what has historically driven success with this audience and transform these insights into a powerful, data-driven campaign strategy:

- Reach the student target audience efficiently
- Drive Consideration
- Boost sign-ups of Gemini Pro

**Your Mission**

# Decode What Drives Impact

Proprietary + Confidential

Using the datasets provided generate key insights to help the data strategist when planning the next campaign. There are 3 data sets:

- **Historic Campaign data:** spend, reach, impressions, sales
- **Historic Brand Lift Studies:** Historic campaign impact on Consideration
- **Creative testing results for upcoming campaign** Brand lift by creative concept, market, channel and age demo

**Output:** Short slide deck with 3-5 key insights and supporting data.

## Things to Include:

- **What trends exist in the campaign data?**
  - Which markets and channels performed best? (ie. had the most sales and best efficiency?)
  - What is the relative cost to target by market/channel?
- **Which things worked best for brand lift?**
  - What campaigns were most effective (drove the most relative lift)
  - Which were statistically significant?
  - **BONUS:** Which was most efficient (requires spend from campaign data)
- **What creatives (adverts) resonated best with our target audience?**
  - Does this differ by market?

**Data Scientist Approach**

# Design the Ultimate Student Campaign

Proprietary + Confidential

Use the high level results provided combined with any insights generated via Google Gemini. Put together your recommendations for the upcoming campaign to maximise the impact of the student campaign within the budget.

Use Gemini to add insights and understand:

- Size of target audience by market
- Media consumption behaviours of your audience
- Approaches to budget allocation

**Output:** The recommendations should be in a short slide deck and need to cover the following areas:

- **Market selection:** Which markets should this campaign be run in to maximise overall impact?
- **Media execution:** Which channels, placement and tactics should we use for the campaign
- **Budget allocation:** Consider target audience size and historic cost to target to determine budget allocation between channels/markets
- **Creative feature focus:** Which creatives should be selected for the campaign based on the creative testing outcomes?

Data Strategist Approach

# The Data

## Campaign Data

Shows historic campaign performance over time.

Use this to understand efficiency of different markets/channels ie.

- Cost per impression
- Cost per conversion

## Brand Lift studies

In-market Brand lift outcomes associated with historic campaigns:

- Calculate relative lift and statistical significance first.
- Join to campaign data to understand brand lift efficiency (using cost per lifted user)

## Creative Testing Results

Contains brand lift outcomes for various potential adverts before putting them in to market.

- Use to determine which ads will suit which market / channel combinations best.

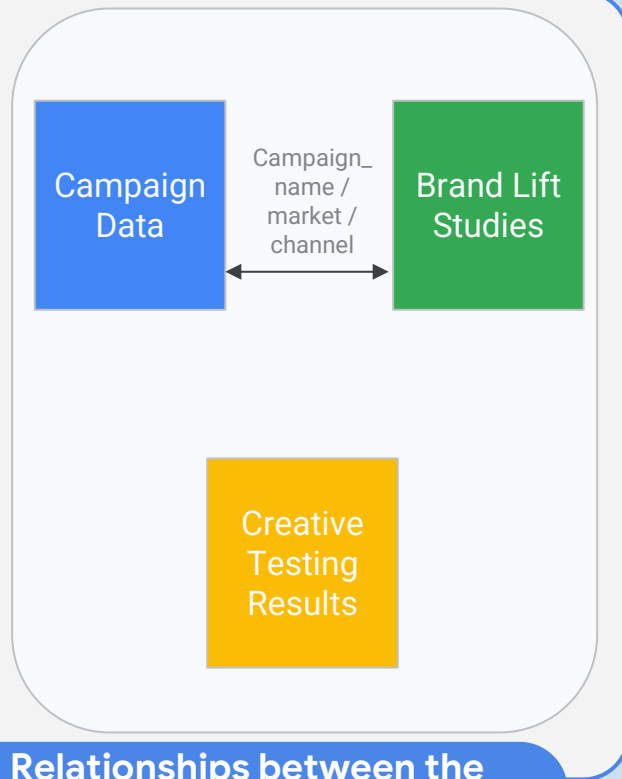

### 3 Different Data Sets to Help

*Tip: Use Gemini to help you calculate statistical significance of brand lift outcomes.*

You will notice there are columns with the same names in each data set. This will allow you to 'join' the data together and create more powerful insights than working with each dataset independently.

By joining Campaign Data to Brand Lift Studies you can understand the cost per lift of each campaign in each market - ie. the efficiency of the campaign given cost of reach.

**Tip:** Use Gemini to help you here. Upload the data sets and ask it to provide you with instructions on how to join them using a 'join key'

Relationships between the  
Data: Joining

# What happens next? - Resources will also be emailed to you this evening

Proprietary + Confidential

## 1. Email

**Subject: Access Google Marketing Step Up Career Challenge Resources Now!** 

Good evening,

Thank you for joining today's **Google Step Up live online career challenge** - "**Power Google's Gemini Pro Breakthrough!**"

**Step 1 - Career challenge resources**  
Here is a link to the recording and Google Step Up resources - you can also use your personal link from the Zoom confirmation email to go back to the Zoom Lobby to download these and view the recording of the session.

- PowerPoint presentation
- Data set (Excel worksheet)
- How to Guide

*If you were unable to attend the live session you can still complete this career challenge by watching the live recording.*

**Step 2 - Completing the career challenge**

- **Your Mission:** Use the dataset to answer the questions we provide you to start fact-finding and provide data points (information) for Google.
- **Tell us your Plan:** Create a story using impactful images to detail your fact-finding mission! You can do this by creating 2-3 slides using PowerPoint, Canva or any other platform of your choice.

**Step 3 - Submitting your Work**  
Please email your completed Google Step Up career challenge work to [info@digdata.online](mailto:info@digdata.online) by 6.00 pm on 19th February with the following information:

- Full name
- Year group
- University name

If you have worked on this challenge with a friend(s) please also include the above information for each person.

**Step 4 - What happens next?**

- Please complete this [short feedback survey](#) so we can tell Google what you have learnt and enjoyed about the career challenge.
- When we receive your feedback survey response, your virtual work experience will be sent to you via email within a month from [alex@digdata.online](mailto:alex@digdata.online).

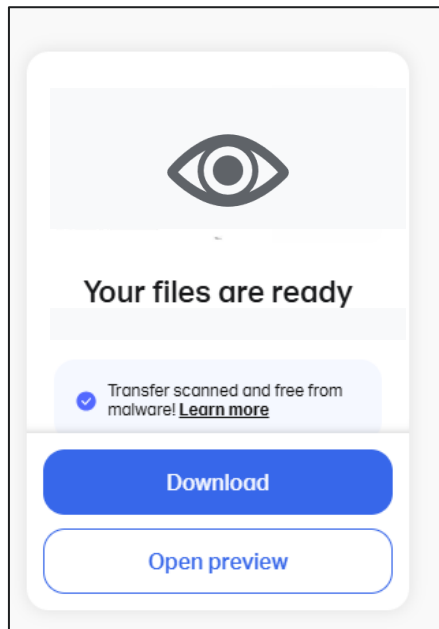

If you have any issues accessing any of the above, please email [info@digdata.online](mailto:info@digdata.online).

Best of luck completing the challenge.

Kind regards,

Rachel Keane  
Chief Data Inspirer  
Data Inspiration Group Ltd
